

..... Sample SSDAN Datasets

Below is a list of only *some* of the SSDAN datasets, to give you an idea of the kinds of datasets SSDAN has available (see diagram below for an explanation of the information which appears on each dataset listing). We have a broad array of datasets, many of which can be downloaded from this website. Many more come bundled on a diskette with our student workbook, *Investigating Change in American Society*. Please let us know if you would like any additional information about our datasets, or if you would be interested in creating your own, custom datasets.
