

..... Sample SSDAN Exercise

Below is a sample exercise that will get you started using StudentChip with SSDAN datasets, and the attached tutorial will guide you through the steps toward obtaining the answer.

Sample Exercise Are there differences in the earnings of women and men, ages 35-44, in 1990? Do these differences decrease when we look at specific occupations? (*WORK9-35*)

- Create a stacked bar chart with side by side bars for women and men; for each occupational category, stack by earnings.
